PROFESSIONAL SUMMARY

Systems Engineering student and Appian Developer with a strong focus on AI & ML solutions and Process Automation. Combines technical expertise with solid sales knowledge and client management skills gained through Account Management roles, allowing for a unique perspective on aligning software solutions with business goals. Experienced in building enterprise applications using Appian, integrating AI Skills, and automating workflows. Proven ability to bridge the gap between technical requirements and commercial value.

EDUCATION

Bachelor of Science: Systems Engineering, Expected in 05/2027

Escuela Colombiana De Ingenieria Julio Garavito - Bogota, Colombia

TECHNICAL SKILLS

- **Appian & Automation:** Appian (Interfaces, Process Models, Records, SAIL, Web APIs), Appian AI Skills, BPMN, RPA Tools (Tiny Task), Workflow Logic.
- **AI & Machine Learning:** Machine Learning Concepts, NVIDIA AI Basics, Document Classification, Data Fabric.
- **Programming:** Java (OOP, Clean Code), Python, SQL.
- **Tools & Methodologies:** Git, GitHub, IntelliJ IDEA, Jira, Scrum/Agile.
- **Workspace Tools:** Google Workspace, Slack, Notion, Trello, Monday.com.

EXPERIENCE

Appian Development Analyst, December 2025 – Present

SUPPORTICAL – Bogotá (Remote)

- Designed and implemented scalable Appian solutions, creating intuitive SAIL Interfaces, complex Process Models, and optimized Record Types (Data Fabric) to digitize business workflows
- Developed robust API Integrations to connect Appian with external systems, ensuring secure data exchange and seamless synchronization across platforms.
- Deployed an AI-driven email classification system using Appian AI Skills, training Machine Learning models on .eml datasets to automate departmental routing.
- Executed a major code refactoring project to standardize object naming conventions and implemented RPA solutions to automate repetitive maintenance tasks.

Account Manager & Community Manager, April 2025 – August 2025

MOF agency – Miami (Remote)

- Managed multiple creator and subscription-based accounts. Handled client communication, cross-selling, and upselling, generating \$10,000+ in direct sales.
- Processed and tracked 400+ transactions while maintaining structured documentation.
- Improved client satisfaction through efficient communication, expectation alignment, and fast response times.

Account Manager, September 2024 – December 2024

JU-IT Automation Solutions – Amsterdam (Remote)

- Supported automation projects using Make.com, Zapier, and Google Workspace to automate small to medium projects.
- Gathered requirements, defined deliverables, and coordinated with technical teams using Scrum, ensuring smooth communication and accurate documentation.
- Updated workflows, tracked project progress, created SOP documents and PID documents.

Cashier April 2024 – 2024

Supermercado Ramirez hermanos – Bogotá

- Operated cash register, stocked inventory, and managed deliveries.
- Developed strong customer service, cash handling, and communication skills.
